THIS BOOK IS DEDICATED
TO MY OLD FRIEND
AND PREVIOUS EMPLOYER,
RUSS COATS.

INTRODUCTION.

THE object of my book is to afford simple and practicable directions for manufacturing all kinds of plain and fancy drinks, that every man may become his own bar-keeper, at home or at the club-room, and at the same time giving to the professional bar-keeper my own extended experience behind the bar.

The recipes in this book are not what are commonly known as "book recipes," but are the results of long and continued practical experiments by myself and others of my acquaintance. They may be relied upon in every particular as accurate, and under favorable circumstances the results will be found entirely satisfactory. Tastes differ in certain cities, and certain drinks, prepared according to the prescriptions in this book, would not perhaps be acceptable all over the country, but it has been my endeavor to strike a "happy medium" that will render the collection of value to old bar-keepers as well as new beginners.

GENERAL INSTRUCTIONS.

The most unpleasant duties of a bar-keeper is the morning work. Then the bottles, reduced by the demands of the day and night previous, have to be refilled; the glasses used previous to closing, washed; the bar cleaned, and everything put in order for the day. All well-regulated bars, *i. e.*: where there is a prosperous business, an assistant bar-keeper is usually detailed for this work; but in bars where the receipts are more limited, it devolves upon the regular bar-keeper, whose duty it is not only to close, but open the bar in the morning.

To keep a bar clean and neat during the day, the man in charge should have an abundance of towels—such as fall towels for the front of the bar, hand towels for the rear of the bar, fine linen towels for drying glasses and bottles, and a chamois towel for polishing the glassware. Every bar-keeper of course, has his own ideas about the rear decorations of a bar, and I would only suggest in a general way that the ornaments be selected with some eye to neatness and taste, rather than show and grandness. There should be a desire for effect rather than grandeur. The rear of the bar should be re-arranged at least once a week, and the weekly shifting of the glasses, decanters and bottles of different colors and shapes, will be a constant study for any bar-keeper who has a pride in his work. By thus changing the appearance of the rear, the bar can always be kept attractive, inviting and clean. So, too, the apparel of a first-class bar-keeper. I would recommend always, at all seasons of the year, an abundance of neat aprons. In the winter a neat, fur-trimmed cardigan jacket should be worn; and for summer months, a white duck coat with a white necktie should always be preferred.

So, too, the tools necessary for work in a first-class bar, I would mention cork-screws, gimlet, shakers, ice picks, ice shaver, bar spoons, cocktail sieve, lemon knives, lemon squeezers, ice scoop, beer mallet, ale measures, faucets, wine cooler, &c.

GENTLEMEN'S SIDEBOARD COMPANION.

MIXED DRINKS AND HOW TO MAKE THEM.

No. 1. The Cocktail.

The Cocktail is a very popular drink. It is most frequently called for in the morning and just before dinner ; it is sometimes taken as an appetizer ; it is a welcome companion on fishing excursions, and travelers often go provided with it on railroad journeys.

No. 2. Champagne Cocktail.

This recipe is for a party of four : Take four half-pint Champagne Goblets, place in each two lumps of cut loaf-sugar, add two dashes of Angostura Bitters, and a piece of lemon peel in each glass. Fill up with Wine direct from the cooler ; agitate well with a spoon. One quart bottle of Champagne will make four large Cocktails. Be sure and have your Wine cold. Never put ice in Champagne, as it kills its flavor.

No. 3. Brandy Cocktail.

Fill large bar glass one-third full of cracked ice, add two dashes of Angostura Bitters, four or five dashes of Gum Syrup, one pony-wine-glass of Cognac Brandy. Stir with bar spoon ; strain in

cocktail glass; cut a piece of lemon-peel, and twist it in or place it on the rim of the glass. Cocktails should never be shaken. Keep a line of cordials in your bar.

The most popular are Chartreuse, Curacao, Maraschino Benedictine, and Absinthe. Add a dash of any of the above and it will improve your cocktails in flavor.

No. 4. Whiskey Cocktail.

Follow the same method here as advised in No. 3, using the ingredients in the same proportion; substituting Whiskey for Brandy.

No. 5. Gin Cocktail.

Follow the same method here as advised in No. 3, using the ingredients in the same proportion, substituting Gin for Brandy.

No. 6. Brunswick Cocktail.

Fill large bar glass one-third full of cracked ice, two light dashes of Angostura Bitters, one pony wine glass of Brandy, one pony-brandy-glass of Marschino; stir with bar spoon, strain in bar glass, add sliced fruit in season—strawberries, pineapples, oranges, etc.

No. 7. Morning Glory Cocktail.

Fill large bar glass one-third full of cracked ice, two dashes of Absinthe, two of Quinine Bitters, four or five dashes of Gum Syrup, one pony-wine-glass of Rye Whiskey; stir with spoon. Strain in cocktail glass.

No. 8. Absinthe Cocktail.

Fill large bar glass one-third full of cracked ice, add two dashes of Angostura Bitters, one pony-brandy-glass of Absinthe, four dashes of Gum Syrup, one-half pony-wine-glass of water; stir with spoon. Strain in cocktail glass.

No. 9. Sherry Cocktail.

Fill large bar glass one-third full of cracked ice, add two light dashes of Angostura Bitters, four dashes of Gum Syrup, one pony-wine-glass of Sherry Wine; stir with bar spoon. Strain in cocktail glass.

Use small punch bowl, quarter pound of loaf sugar, one pint of boiling water, the peel of a lemon, pour in a quart bottle of Champagne and a half pint of Sherry; stir well, and add a block of ice. Serve in hock glasses.

278. Golden Sour.

Fill large bar glass one-third full of cracked ice, one table-spoon of bar sugar, one-half wine-glass of water, five or six dashes of lime or lemon juice, the yolk of an egg, one wine-glass of Brandy or Rye Whiskey; shake, and strain in small bar glass.

279. Silver Sour.

Fill large bar glass one-third full of cracked ice, one table-spoon of powdered sugar, one-half wine-glass of water, five or six dashes of lime or lemon juice, the white of an egg, one wine-glass of Gin; shake, and strain in small bar glass.

280. Canada Cocktail.

Fill large bar glass one-third full of cracked ice, two or three dashes of Angostura Bitters, four or five of gum syrup, one pony-wine-glass of Rye Whiskey; stir with bar spoon; strain in cocktail glass, and dash with Port Wine.

281. How to make Gum Syrup.

Take two pounds of granulated sugar and place it in a pan; add a quart of boiling water, stir well, place it on a stove and let it cook for a few minutes, then put two table-spoons of vinegar in to clear it; strain through a piece of flannel; let it cool and it is ready for use.

282. How to wash your Bar Glasses.

Take a pail of hot water, place a few lumps of sal soda in and let it dissolve; take your glass-brush and rub them well in the sal soda water, then rinse them in cold water and they will have a fresh appearance.

283. How to Clear Roiley Wine.

Take the bung out of the barrel and pour in a large glass of milk; put the bung back and let it stand for two days, and it will be ready for use.

FRUIT SYRUPS AND HOW TO MAKE THEM.**284. Simple Syrup.**

296. How to Keep Cider.

In the fall, when you put your cider in, stand it with the head up, bore a small hole and place a glass syphon in; also place a large glass of water on the barrel with the other end of the syphon in, and let the cider work; keep the glass filled up with water to keep the air out until fermentation has ceased; then add two gallons of spirits, cork it up, and in the spring wrack it off, and you will have cider like wine.

297. To Clean Copper.

Before cleaning copper the surface should be first wiped with a damp cloth then, with one-half of a lemon, rub the surface to be cleaned. Follow this by a brisk scrubbing with Sapolio and a brush, then wash with cold water and rub dry with a woolen cloth.

298. To Clean Silver.

Use Silver soap or some whitening, moistening the same with a few drops of Gin, and rub with a woolen cloth or silver brush. Then wash in some hot soap suds, dry well with a cloth and polish with a chamois.

299. To Clean Bar Bottles.

Bar bottles should always be kept clean and bright. To clean them pour into them two ounces of small gun shot with some luke warm Sal soda water, and shake well. Then rinse with cold water.

300. To Clean Mirrors.

Make a lather with a small soft sponge and a cake of castile soap, and rub the surface to be cleaned with the sponge, and follow this with a brisk rubbing with a fine linen towel. Then polish with a chamois. Ammonia is some used, and when preferred to soap should be used with a sponge. Moisten the sponge with hot water, then pour on the sponge a few drops of spirits of Ammonia, rubbing the glass with this until all dirt is removed. Follow this by the use of a towel and chamois, same as with soap. Show cases may be cleaned by the same processes.

301. To Remove Tight Bottle Stoppers.

When the cork or stopper appears immovable strike the bottle on alternate sides with a piece of wood. When this fails wrap the neck of the bottle in cloth dipped in hot water.

302. Chapped Hands.

Many bar-beepers are afflicted with chapped or cracked hands, from constant association with water and liquids. The following recipe will be found valuable, and was furnished me by Dr. A. Morel, the celebrated physician of Milwaukee: One-half ounce Tannin, one-half ounce Glycerine, ten drops Carb. Acid, four ounces Rose Water; mix together. Rub hands with this at pleasure.

303. May Wine.

This drink is of German origin, and is very popular in Germany, particularly in the Rhine Valley during the spring months. This receipt was furnished me by Mr. Lieders, proprietor of the Hotel Brunswick. Take a large punch-bowl, place a half pound of sugar in, moisten with a quart of water, some sprigs of Waldneister, pour over this two quarts of Moselle Wine and a pint of Champagne or a gill of Brandy, add a small block of ice; stir well with a punch ladle. Serve in punch glasses.

304. Glee Wine.

Place in a large sauce pan a quarter of a pound of loaf sugar, moisten with a few drops of boiling water, add some whole cinnamon and cloves and a quart bottle of Claret. Put this on the fire and let it cook until it boils up, then take it off and serve in tea cups.

305. Japanese Cocktail.

Fill large bar glass one third full of cracked ice, two or three dashes of Angostura Bitters, one pony wine-glass of Maraschino or Curacao, one pony wine-glass of Brandy or Gin; stir with a spoon, strain in a Hock glass.

306. Japanese Punch.

Fill large bar glass with shaved ice, one tablespoon of bar sugar, moisten with a few drops of water, the juice of a whole lemon, and the peel of one, a half wine-glass of Brandy, one barspoon of Arrack; shake well and garnish with sliced pineapple. Sip through a straw.

307. Blue Blazes.

This recipe was furnished me by the veteran bar-keeper O. S. Hulbert, the proprietor of Oyster Bay. Take two silver or china mugs, place in one a wine-glass of Irish or Scotch Whiskey, and in the other a wine-glass of boiling water, light the liquor and pour from one mug to the other at least six or seven times, then blow out the fire and serve in bar glass with sugar, nutmeg, and a piece of lemon peel.

308. Clam Chowder.

For a party of twenty-five; furnished by Charles Schweigert, chief cook at Lieders' Hotel Brunswick, Rochester, N. Y. Take one-half pound salt pork, cut in fine pieces, and roast in a sauce pan until pork assumes a brownish color. Add six large onions sliced, mix them with the pork and steam them. Then cut up fine eight turnips, six carrots, twenty raw potatoes and some celery tops and one-half gallon tomatoes. Cook all of the above together with a large beef done and add fifty Clams chopped fine, with the Clam juice, and cook for one and one-half hours. Season well with red pepper, salt and thyme, and if handy a little fine chopped parsley, and it is ready for serving.

How to Keep and Always Draw a Good Glass of Beer.

How to keep Lager Beer and Ale through all seasons, and to be able to draw a cool, foaming glass of either of these popular beverages, is one of the secrets of the business. How many places there are where one can get a poor glass of lager; how few places there are where one can get a good draught of the proper temperature, and with the proper amount of life to it. To have good beer, it should be allowed to stand in the ice box or refrigerator at least a day, before it is tapped. This gives it time to reach the proper temperature of the box. You should always have a thermometer in the ice box. and gauge the temperature according to the season of the year. During the summer season keep the vault or ice box filled with ice, and use, if possible, the Improved

HYDRO-PNEUMATIC PUMP AND REGULATOR,

(See Advertisement next page.)

It has been pretty well established by this time that the best way to draw beer is by the HYDRO-PNEUMATIC PUMP, which is now in universal use, and which I have used to my complete satisfaction. It is a wonderful invention. The pipes leading to the beer vault should be cleaned out at least once a week with hot water and sal soda, and afterwards drained with cold water. Every time you tap the pipes should be rinsed with cold water. If the beer should become too cold, a lighted candle placed in the ice or beer vault will raise the temperature in a short time.

THE IMPROVED Hydro-Pneumatic Pump and Regulator, (MOORE'S PATENTS.)

DRAWING AND PRESERVING LAGER BEER AND ALE.

This is the original and only successful Air Pump that has yet been invented for the purpose.

PUMP. Size, 6x8x4½.

Wolf's Cooler. Patent applied for.

Its success has induced others to attempt to introduce various so-called "Improved Air Compressors" in the market; but as yet **not one** of its imitators has succeeded in perfecting a machine that will answer the purpose.

The inventor, MR. CHARLES MOORE, is a practical Brewer and a first-class mechanic; a combination that after years of experiment, and at the expense of thousands of dollars, has resulted in perfecting the Pump. An intelligent investigation of the absurd and trappy machines now so freely offered will insure a continuance of the large trade already created.

Appliances answering the purpose of water, where no pressure can be had, always on hand.
